New Space Race Replicates Old Geopolitical Alliances, With An Indian Twist

Last week, Russia [launched its Luna-25 robotic probe with a Sojuz 2.1b rocket](#), in an ideal continuation of the lunar programme interrupted 47 years ago. The Russian aim is to achieve the first successful landing on the southern polar region of the moon, a location believed to contain valuable deposits of water ice. This is only a piece of the much larger jigsaw that constitutes the ongoing second race to the moon, after the one that occurred in the 1960s-70s, which [culminated in the moon landing of Neil Armstrong and Buzz Aldrin on 20 July 1969](#).

Like the first moon race, this second is occurring in parallel with a much wider Cold War between two of the world's super-powers. In the 1960-70s, these were the US and the Soviet Union. In that instance, the Soviets managed to make initial advances with the first satellite in orbit ([Sputnik](#)), the first animal in space ([the dog Laika](#)) and the first man in space ([Yuri Gagarin](#)). The US only later caught up, with the moon landing. This time, Cold War 2 is between US and China, and this moon race is also being led by these two countries.

The two contenders share the same aim: establishing a monopoly in certain areas of the moon, in order to be able to claim the resources deriving from them (in particular, rare materials that are necessary to building semiconductors). With the same aim in mind, the US and China will follow two very different approaches. The US is involving the private sector in the race, with both [Blue Origin](#) sponsored by Jeff Bezos and [Space X](#) by Elon Musk aiming to provide a rocket for the mission (the Blue Moon and Starship rockets, respectively). On the other hand, the Chinese government will keep a monopoly over its mission, while seeking inputs from its allies. China has already established a presence on the moon with [Yutu-2](#), a rover that has been sending precious data from "the dark side of the moon" in the last few years.

In terms of alliances, there are 27 countries on the US side that have signed the [Artemis Accords](#), including France, Italy, Spain, and the UK from Europe, and also Canada, Japan, Brazil, and Israel. Initially even Russia was part of it: [its space agency Roscosmos in 2017 signed an agreement with NASA](#) to build an orbiting space station called Lunar Gateway. But as time passe, Russia started siding with China, and in 2021 it signed an [agreement to build the International Lunar Research Station](#), an embryonic colony. China can also count on the collaboration of Pakistan, Bangladesh, Iran, Mongolia, Peru, Thailand and other countries from [the Asia-Pacific Space Cooperation Organization](#).

These alliances tend to replicate the groupings that we generally see in the Cold War 2 disputes, with three notable exceptions. First, Turkey, a NATO member, has signed an agreement with China for this space race. Second, the United Arab Emirates has signed both the Artemis Accords and an agreement with China. (Holding both positions like this seem untenable in the long run, as the US will likely soon demand these countries to make a choice, following the logic of "you're either with me or against me"). And third, most importantly, India, [which in Cold War 2 is hedging its bets and maintaining a non-aligned position](#), in this case has decided to sign the Artemis Accords and side with the US.

Looking Ahead

The Week Ahead: EZ QoQ GDP To Advance; EZ Headline Inflation Set To Fall, While Core Remains the Same; UK Inflation To Fall

In the US, in July, retail sales are likely to advance by 0.4% m-o-m (*p*: 0.2%).

In the EZ, in Q2, according to preliminary estimates, GDP growth is expected to advance by 0.3% q-o-q (*p*: 0.0%) and decelerate 0.6% y-o-y (*p*: 1.1%). In July, headline inflation is likely to cool off to 5.3% y-o-y (*p*: 5.5%), while core inflation is expected to stay unchanged at 5.5% y-o-y. June's IP is seen contracting by 4.2% y-o-y (*p*: -2.2%).

In the UK, in July headline inflation and core are expected to ease off to 6.8% y-o-y (*p*: 7.9%) and 6.8% y-o-y (*p*: 6.9%). In June, unemployment change is expected to stay unchanged at 4.0%. In July, retail sales are seen shrinking by 2.1% y-o-y (*p*: -1.0%) and 0.5% m-o-m (*p*: 0.7%).

The Quarter Ahead: Biden Orders Ban On New Investments In China's High-Tech Sector; Ukraine-Russia War; Russia's Lunar Mission

US to ban American investments in China tech sector. The White House announced a ban on certain US investments in China that involve sensitive technologies like computer chips. This is part of a growing effort by Washington to distance itself from Beijing due to concerns about national security. Biden called China a "ticking time bomb" because of its economic challenges.

Ukraine-Russia war. The UN condemned a deadly Russian missile attack on a hotel used by its officials in the city of Zaporizhzhia. Meanwhile, Putin "considers coming face to face with world leaders" at G20 summit, according to Kremlin source. A Kremlin official has indicated that Putin has not dismissed the possibility of personally attending the G20 gathering of significant economies on September 9-10 in New Delhi, the capital of India.

Russia's Luna-25 mission launches to the moon. Russia sent its first spacecraft to the moon after a gap of 47 years. Their aim is to achieve the first successful landing in the southern polar region of the moon, a location believed to contain valuable deposits of water ice. Russia's space agency chief Borisov said that at least three other lunar missions were planned over the next seven years, and that after that Russia and China would work on a possible crewed lunar mission.

Last Week's Review

Real Economy: US Headline Inflation Rose, While Core Inflation Fell; EZ Economies' Inflation Declined; UK QoQ GDP Advanced

In the US, in July, the headline inflation rate rose to 3.2% y-o-y (*c*: 3.3%; *p*: 3.0%), while core inflation fell to 4.7% y-o-y (*c*: 4.8%; *p*: 4.8%). August's consumer sentiment declined marginally to 71.2 (*c*: 71; *p*: 71.6).

Among the largest EZ economies, in July, according to final estimates, the headline inflation rate: *i*) decreased to 6.2% y-o-y (*p*: 6.4%) in Germany as expected; *ii*) fell to 5.9% y-o-y (*c*: 6.0%; *p*: 6.4%) in Italy; and *iii*) eased off to 4.3% y-o-y (*p*: 4.5%) in France as expected.

In the UK, according preliminary estimates, in Q2, the GDP growth grew by 0.2% q-o-q (*c*: 0.2%; *p*: -0.1%) and advanced by 0.4% y-o-y (*c*: 0.2%; *p*: 0.2%). June's IP rose by 0.7% y-o-y (*c*: -1.1%; *p*: -2.1%).

Financial Markets: Stock Prices Declined; Yields Edged Up; Dollar Index And Oil Prices Increased, While Gold Prices Declined

Market Drivers: Wall Street finished with a varied outcome due to mixed economic data raising concerns about the Fed's efforts to control inflation being incomplete. Conflicting inflation signals make investors think that the Fed may need to raise interest rates further. US producer prices increased slightly more than expected in July, pushing 10Y UST yield up. EZ bond yields followed US peers higher.

Global Equities: declined w-o-w (MSCI ACWI, -0.6%, to 684.68). The US S&P 500 index edged down (-0.3% w-o-w, to 4,464.05). In the EZ, share prices were down (Eurostoxx 50, -0.3% w-o-w, to 4,320.65). In EMs, equity prices moved down (MSCI EMs, -2.0%, to 997.72). Volatility fell to 15.30 (VIX S&P 500, 52w avg.: 21.5; 10y avg.: 18.5).

Fixed Income: w-o-w, the 10-year US Treasury yields rose (+12 bps to 4.16%). The 2-year US Treasury yields rose (+12 bps to 4.89%). The German 10-year bund yield edged up (+9 bps to 2.63%).

FX: w-o-w, the US Dollar Index increased (DXY, +0.8%, to 102.85; EUR/USD -0.6%, to 1.1). In EMs, currencies decreased (MSCI EM Currency Index, -0.5% w-o-w, to 1,677.59).

Commodities: w-o-w, oil prices increased (Brent, +0.6% to 86.73 USD/b). Gold prices declined w-o-w (-1.5% to 1,945.70 USD/Oz).
